

Website Testing: 15/03/2023

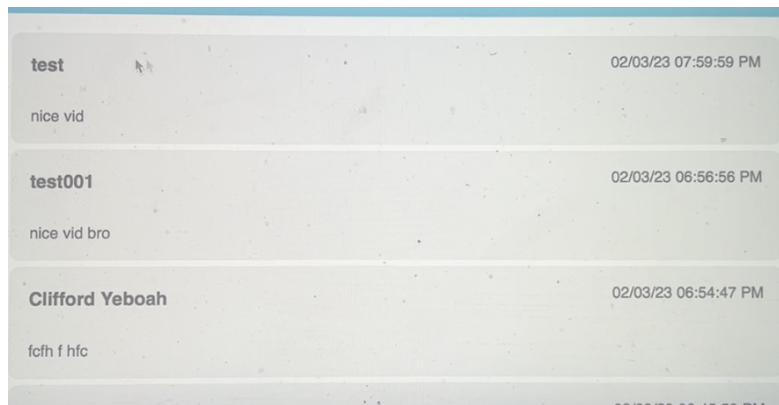

**Feature implemented by:** Clifford Yeboah (ca517)

**Feature tested by :** Saahil Shah (ss2357)

Functionality Testing (No Errors!)

Video Tutorials Page

- Videos included play perfectly. ✓
- Comments section: able to fill out comment and it displays at bottom of page. ✓

- Requirements for comments section: Valid email must be entered, displays error message of requirements that aren't met. ✓

This was fixed by adding a jQuery plugin is designed to validate and process a form submission for a comment section on a website.

A screenshot of a comment form on a website. The form has three input fields: 'Name', 'Email', and 'write your comment'. Below the 'Name' field is a red error message 'Please enter your name'. Below the 'Email' field is a red error message 'Please enter your email'. Below the 'write your comment' field is a red error message 'Please write your comment'. At the bottom of the form is a 'SUBMIT' button.A screenshot of a comment form on a website. The form has two input fields: 'test' and 'write your comment'. Below the 'test' field is a red error message 'Please enter a valid email address'. Below the 'write your comment' field is a 'SUBMIT' button.

- Display a message notifying user that comment has been submitted. ✓
