Functionality Testing: (Error Fixed)

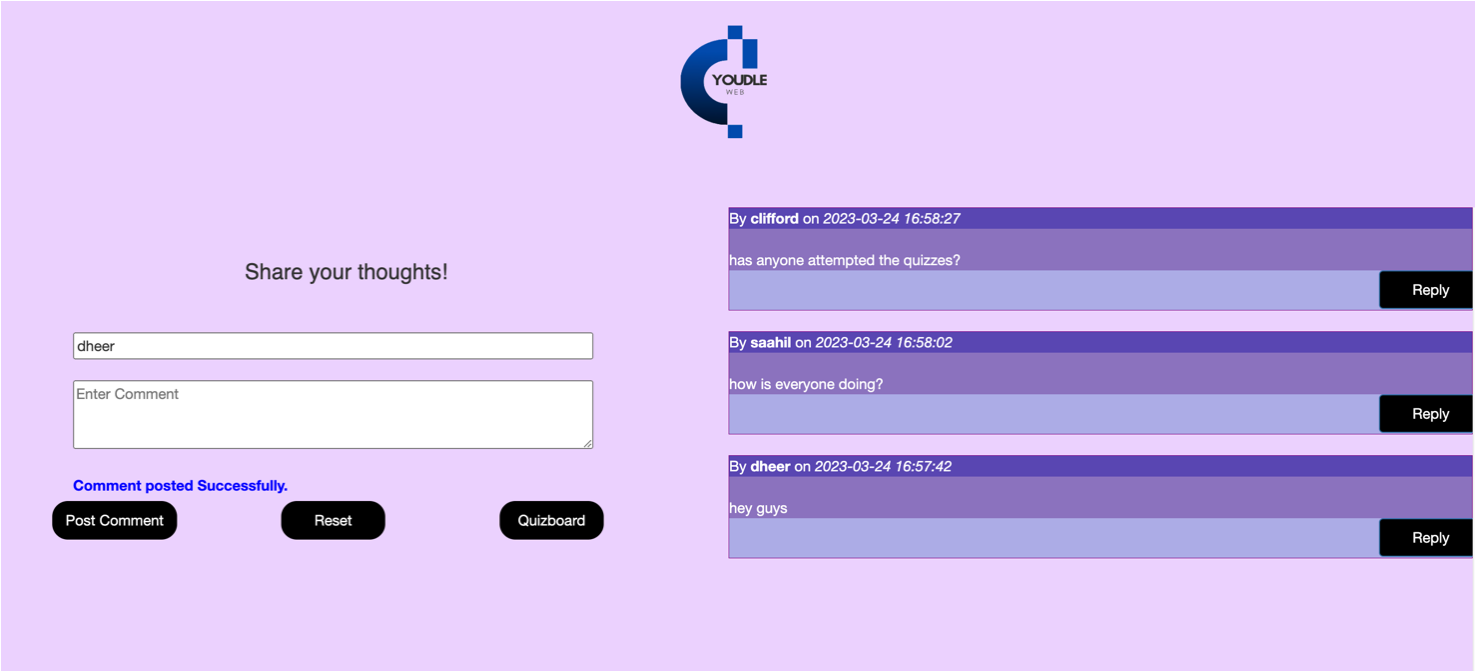

Discussion Forum:

- Entering name and comment. ✓
- “Reset” and “Quizboard” buttons work fine , reset will clear the values in the input field, and quizboard takes you to the quizboard. ✓
- Success message when comment is posted successfully. Works fine as shown below. ✓

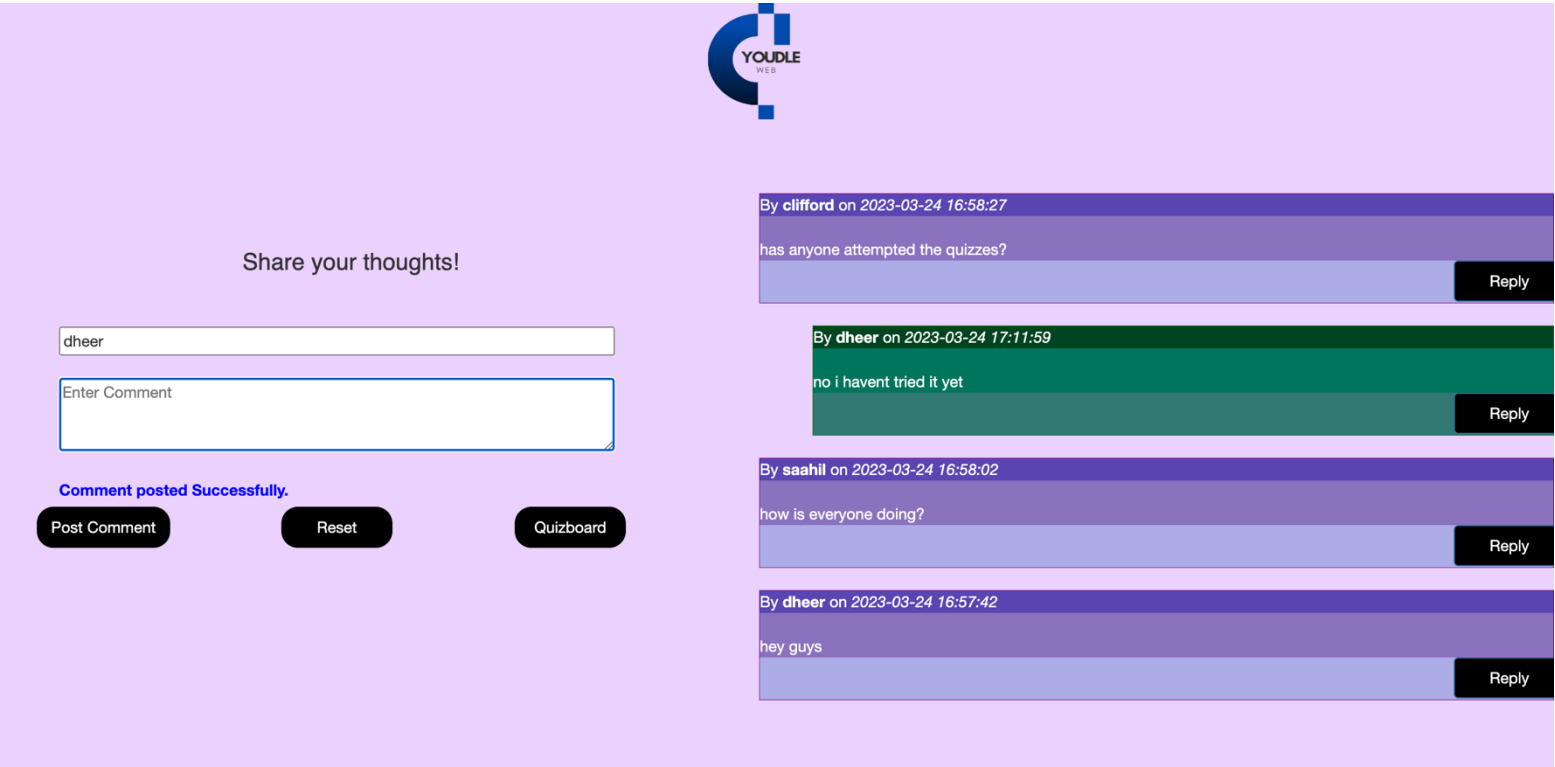

The screenshot shows a purple rectangular panel with the heading "Share your thoughts!". Inside the panel, there is a text input field labeled "Enter Name" and a larger text area labeled "Enter Comment". Below these fields, a blue message states "Comment posted Successfully.". At the bottom of the panel, there are three black buttons with white text: "Post Comment", "Reset", and "Quizboard".

- Main Comments displaying in the correct format. Works fine and the main comments made are displayed to the right of the input form displayed as a purple panel. ✓

- Replies displaying in the correct format. Error, after clicking on the reply button, and posting a comment, the comment will not be displayed at all. Fixed by changing assigned id for the

button from parent id to comment id: now, when a reply is made it will display it in a green panel below the comment that was replied to.
