Website Testing: 20/01/2023
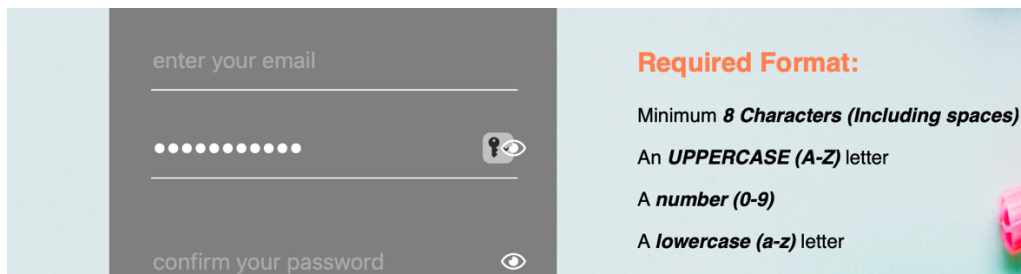

Feature implemented by: Saahil Shah (ss2357)

**Feature tested by** : Tope Balogun (tb520)

Functionality Testing:

Registration

- Entering name, email, password, confirm password, gender, security question, security answer. ✓

- Dropdown menu for security question and gender ✓

- Password requirements dialogue: it displays but when typing the password, it does not tick off the requirements that are satisfied. ✗

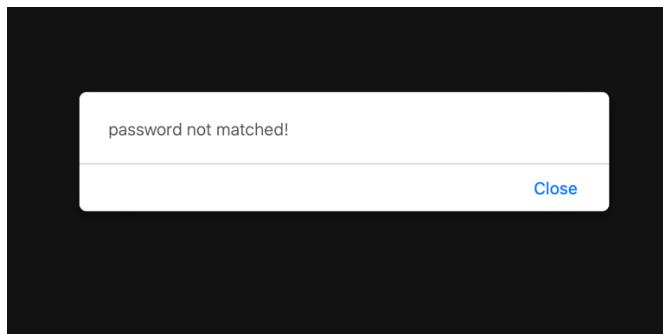

- Show password feature for password and confirm password: eye icon displays but when clicked on, the password does not appear in text. ✗

- "Login instead?" button works fine and once clicked; it takes you to the login page ✓

- "Complete Registration" button: when clicked on it gives an error instead of adding user to the database. ✗

Object not found!

The requested URL was not found on this server. The link on the <u>referring page</u> seems to be wrong or outdated. Please inform the author of <u>that page</u> about the error.

If you think this is a server error, please contact the <u>webmaster</u>.

Error 404

<u>localhost</u>
Apache/2.4.54 (Unix) OpenSSL/1.1.1s PHP/8.2.0 mod_perl/2.0.12 Perl/v5.34.1

- All fields are required, and form should not submit if a field is empty: Works fine, if a field is left empty and the "complete registration!" button is clicked, form will not submit, and an error message is shown. ✓

- Cannot register the same user twice: not working as the database contains multiple entries of the same person. ✗

- Password and confirm password field should match: works fine and gives an error message when they are not the same ✓

password not matched!

Close

- Email and password must follow a specific format for the form to be submitted: works fine , error message shown when the password and email address don't match the requested format. ✓
